

#### **CONCUSSION FACT SHEET FOR**

## COACHES

### WHAT IS A CONCUSSION?

Concussion is a complex and potentially significant brain injury that must be taken seriously. Even a 'ding' or what seems to be a mild bump to the head can be serious, failure in recognising this can have major immediate and long-term consequences.

# WHAT SHOULD YOU DO IF YOU THINK YOUR PLAYER HAS CONCUSSION?

No matter whether the player is playing a key role in the match, a player with a suspected concussion should be immediately removed from the field in order to undergo assessment.

#### **RECOGNISE**

If the player has made you aware of any concussion signs or symptoms, or if yourself or another coach has recognised any possible signs further assessment is required.

#### **REMOVE**

You should remove the player from the field immediately, at any point of play – stepwise assessment should be undertaken by a trained medical professional.

#### **RECOVER**

The brain takes time to recover - you should not expect a player to return unless cleared to do so.

#### **RETURN**

A graded return must be followed once symptom free and is a minimum of 6 days.

DEFINITE CONCUSSION

A player with a definite or suspected concussion needs to be seen by a medical professional i.e. A&E or GP immediately and must not go home alone without head injury advice.

## CONCUSSION SIGNS AND SYMPTOMS

Adequate care must be taken in the assessment of a suspected concussion as symptoms may take time to present. If a player has experienced a bump or blow to the head, look for any of the following signs and symptoms of concussion:

SYMPTOMS REPORTED BY PLAYER:	
— Headache	V
— Nausea or vomiting	V
Dizziness or blurred vision	<b>V</b>
— Concentration or memory problems	V
— Just not 'feeling right'	V
SIGNS OBSERVED BY COACHES:	
— Appears dazed or stunned	V
— Moves clumsily	V
— Is unsure of match, opponent or result	V
— Forgets an instruction	V
<ul> <li>Loses consciousness</li> </ul>	V
— Shows mood, behaviour or personality changes	<ul><li></li><li></li><li></li><li></li><li></li><!--</td--></ul>
— Answers questions slowly	V
— Can't recall events after hit or fall	V
